BEWARE. APPLY THIS PRODUCT CAREFULLY. SPRAY DRIFT MAY CAUSE SERIOUS DAMAGE TO OTHER DESIRABLE PLANTS. IT IS AN OFFENCE TO USE THIS PRODUCT ON ANIMALS.

DIRECTIONS FOR USE: Apply an emulsifiable crop mineral oil at label rates with all Vega herbicide treatments. For best results apply to young actively growing grass weeds. Do not apply to plants under stress from drought or waterlogging.

Use the lower rate on seedling grass weeds (2-5 leaf) or actively regenerating rhizomes and the higher rate on tillering plants or hardy rhozomatous grasses. On established sod-bound rhozomatous grasses in non-cultivated crops, suppression only may be obtained.

Vega herbicide is considered to be rainfast if applied at least one hour before rainfall.

White Clover Seed Crops: Annual and perennial ryegrass. Apply 0.5 litres/ha plus crop oil after closing up. After removing stock allow sufficient time for grasses to freshen up (5-10cm new growth) before applying Vega herbicide.

Peas, Lentils, Oilseed Rape: Wild Oats. Apply 0.25 litres/ha plus crop oil when the majority of wild oats are in the 2-5 leaf growth stage. A temporary effect on leaf colour and sheen may occur in peas. This has no adverse effect on crop vigour or vield.

Orchard Crops: Treat actively growing grass weeds as directed in the table. Apply as a directed spray to the base of the trees to avoid fruit contact. Vegetable Crops: Treat actively growing grass weeds as recommended in the table. Do not apply more than 1 litre/ha on vegetable crops. Where no previous experience is available on a particular crop, treat a small area before applying widely.

NB: ASPARAGUS - do not apply during the cutting period.

Forestry: (Radiata pine, Macrocarpa, Douglas fir). Treat actively growing grass seedlings as directed in the table but do not exceed 1 litre Vega herbicide per hectare. Tree Release: Spot Treatment: Use 3.5ml Vega herbicide plus 10ml emulsifiable crop mineral oil per litre of water. Apply 20ml spray solution per square metre. To control broadleaf weeds and for residual weed control, apply in combination with a terbuthylazine herbicide at recommended label rates.

GRASSES CONTROLLED AND RECOMMENDED USE RATES	
Grass Species	Rate litres/ha.
Wild oats, annual and perennial ryegrass, cocksfoot, barnyard grass, summergrass, floating sweet grass, canary grass, bristle grass, volunteer cereals	0.25 - 0.5
Annual poa, smooth witchgrass, soft brome, phalaris, tall fescue, prairie grass, ripgut grome, brown top, barley grass N.B. Chewings fescue, Yorkshire fog and hairgrass will be suppressed but not controlled at these rates	0.5 - 1.0
Couch, paspalum, Indian doab	2.0 - 3.0

IT IS AN OFFENCE FOR USERS OF THIS PRODUCT TO CAUSE RESIDUES EXCEEDING THE RELEVANT MRL IN THE FOOD NOTICE: MAXIMUM RESIDUE LEVELS FOR AGRICULTURAL COMPOUNDS.

WITHHOLDING PERIODS: Vegetable crops - 5 weeks; White clover - 9 weeks: Legume crops - 3 weeks.

COMPATIBILITY: Compatible in tank mixes with terbuthylazine and clopyralid. Otherwise do not apply in combination with other herbicides as efficacy may be reduced.

MIXING: Partially fill the spray tank and add the correct amount of crop oil. Agitate and then add the Vega herbicide. Add the remainder of the water and agitate thoroughly before using. After standing, agitate spray solution well before re-using.

APPLICATION: Apply with conventional spraying equipment using 100-400 litres water per hectare. Use nozzles and pressures that produce a droplet size of 150-300 micrometers VMD. Refer to the manufacturers recommendations for the appropriate nozzle and pressure combinations. Use the higher water rate for dense grass infestations.

RESISTANT WEEDS WARNING: Vega 240EC is a GROUP A HERBICIDE. Naturally occuring weed biotypes resistant to Cyclohexanediones (DIMs) herbicides can become more prevalent after many years of continuous use. To delay the onset of, or control resistant weeds, use in rotation with herbicides of a different mode of action. Since the occurrence of resistant weeds is difficult to detect prior to use Adria New Zealand Limited accepts no responsibility for losses that may result from the failure of this product to control resistant weeds.

. UN 3082. Class: 9, Packaging group: III. ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (CLETHODIM). Do not carry this product on a passenger service vehicle.

Selective post-emergence herbicide for annual and perennial grass control in broadleaf crops and forestry.

Active Ingredient: Contains 240g/litre clethodim in the form of an emulsifiable concentrate.

> GROUP A HERBICIDE

READ THIS LABEL COMPLETELY BEFORE USE

HSNO Classifications: 3.1D, 6.1E (Oral), 6.3A, 6.4A, 6.9B, 9.1B, 9.2A Approved under the HSNO Act 1996, HSR007818. See www.epa.govt.nz for controls. Qualified/Competent Person: Required.

Combustible Liquid. May be harmful if swallowed. Causes skin irritation. Causes serious eve irritation. May cause damage to organs through single, prolonged or repeated exposure.

PRECAUTIONS: Keep out of reach of children. Read label before use. Keep away from heat, sparks, flames, and hot surfaces. No smoking. Wear protective gloves, protective clothing/eye protection/face protection. Wash body thoroughly after handling. Do not breathe fumes/mist/vapours or spray. Do not eat, drink, or smoke when using this product. Avoid release to the environment. Do not apply directly into or onto water.

COMBUSTIBLE LIQUID: Do not use or store near heat or flame.

STORAGE: Store locked up in the original, unopened container in a cool, dry, well-ventilated place, out of direct sunlight and away from stockfeed or foodstuffs.

As a Class 9 Substance with Ecotoxicity Classifications, storage must be carried out in such a manner as to prevent contamination of waterways. It is recommended that The New Zealand Standard for the Management of Agrichemicals (NZS8409) is followed. See Safety Data Sheet for further information.

ENVIRONMENTAL INFORMATION: Very toxic to the soil environment.

TOXIC TO AQUATIC LIFE WITH LONG-LASTING EFFECTS. Avoid contamination of any water supply with chemical or empty container. A strategy to minimise spray drift should be employed at all times when applying spray near aquatic environments.

CONTAINER DISPOSAL: Triple rinse container and add residue to spray tank.

Return empty container to a nearby AgRecovery point for disposal. Dispose of this product only by using according to the label, or at an approved landfill or other approved facility.

FIRST AID: If medical advice is needed, have product container or label at hand. Call a POISON CENTRE or doctor/physician if exposed or if you feel unwell. IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before re-use. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. In case of fire: dry chemical, or carbon dioxide to extinguish fires. DO NOT use a direct iet of water.

SPILLS: Wear approviate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely, according to local Council regulations.

Notice to Buyer: Careful tests have proved that the product is suitable for the recommended purposes when used in accordance with our instructions. However, since storage and use of product are beyond our control, we do not therefore accept any liability for damage or loss of efficacy which may result from the use of this product, whether used in accordance with the directions or not. We are liable for a consistent quality of the product, but the risk of its storage and use is not borne by us.
