

COMPATIBILITY: Avia is compatible with most commonly used pest control insecticides
Domestic and Industrial Premises:

Ants – nests, runs, walls, drains and resting places wherever ants are seen.

Cockroaches – walls, skirting boards, cupboards, pet bedding, behind sinks, stoves and pipes. In particular, cracks and crevices.

Fleas – floors, carpets, skirting boards, kennels, bedding and adjacent wall area.

Flies and mosquitoes – walls, skirting boards and all exposed surfaces where these flying insects may rest.

Spiders – nests and known hiding places, and exposed surfaces where spiders are seen.

Silverfish – locate the source of the infestation and spray. If it cannot be located, spray all the surfaces on which silverfish travel, especially inside cupboards.

Carpet Beetles – Thoroughly wet the infected carpet area so that spray solution penetrates the carpet pile. Removal of furniture or soft furnishings to gain access to infected areas may be necessary to obtain good control. Under heavy infestation, lift the carpet and spray the area underneath it.

Important – Food contamination:

Do not allow spray to contact food, food preparation surfaces or food utensils. Remove or cover all foodstuffs before application. Do not use in areas where edible dairy or meat products are processed, packed or stored. Do not use where food packaging materials (cartons, liners, etc) are stored or assembled. Do not use near air vents or ducts in food stores or processing plants while they are in operation. Wash all food contact surfaces thoroughly before reintroducing any foodstuffs.

DIRECTIONS FOR USE:

Residual control for up to 6 weeks may be obtained, depending on the insect pest, application rate and the nature of the treated surface.

Surface spray only – do not spray into the air.

SITUATIONS	INSECT PESTS	RATES	COMMENT
Houses, flats, factories, shops, warehouses, restaurants, meat and dairy processing plants.	Common spiders	Initial treatment: 30ml in 5 litres of water – or 30ml per 100m ² treated area. Maintenance treatments: 3ml in 5 litres of water – or 15ml per 100m ² treated area.	Apply as a course spray at the rate of 5 litres per 100 square metres or to the point of run-off, which will vary with the nature of the surface being treated. If different water rates are used according to surface porosity adjust use rate to provide the same coverage of Avia per square metre, e.g. 5ml per 20 square metres for initial treatment of spiders. Avia can be applied with a knapsack sprayer or other conventional spray equipment used to control public health pests, e.g. Macromist™ sprayer. Note that Avia does not provide repellent activity of flies or other insects.
	Fleas – knockdown treatment	Initial treatment: 25ml in 5 litres of water – or 25ml per 100m ² treated area.	
	Ants, mosquitoes, fleas and ticks – residual control	Initial treatment: 60ml in 5 litres of water – or 60ml per 100m ² treated area. Maintenance treatments: 30ml in 5 litres of water – or 30ml per 100m ² treated area.	
	Cockroaches: German, American and <i>Drymaplaneta semivittata</i> (Gisborne cockroach)	Initial treatment: 50ml in 5 litres of water – or 50ml per 100m ² treated area. Maintenance treatments: 25ml in 5 litres of water – or 25ml per 100m ² treated area.	
	Flies – knockdown treatment	Initial treatment: 25ml in 5 litres of water – or 25ml per 100m ² treated area. Maintenance treatments: 12.5ml in 5 litres of water – or 12.5ml per 100m ² treated area.	If repellence is required, it is suggested that Picture® 100SC be used.
	Flies – residual control	Initial treatment: 60ml in 5 litres of water – or 60ml per 100m ² treated area. Maintenance treatments: 30ml in 5 litres of water – or 30ml per 100m ² treated area.	

WARNING
KEEP OUT OF REACH OF CHILDREN

Avia®

A residual insecticide for the control of spiders, fleas, ants, cockroaches and mosquitoes in domestic, industrial and public health areas.

Active Ingredient: contains 80g/litre bifenthrin in the form of a suspension concentrate.

GROUP 3 INSECTICIDE

HSNO Classifications: 6.1D, 6.3A, 6.4A, 6.5B, 6.9B, 9.1A, 9.2C, 9.3B, 9.4A

EPA Approval Code: HSR100508

This product must be under the care of an approved handler at all times.

In a transport emergency dial 111, Police or Fire Brigade.
For specialist advice in a First Aid emergency only call:
National Poisons Centre on 0800 764 766.

Net Contents: 1 Litre

WARNING: This substance may be harmful if swallowed, inhaled or absorbed through the skin, and may cause irritation to the skin and eyes. May cause sensitisation from prolonged skin contact. Avoid skin and eye contact. Avoid inhalation of vapours or mist from spray. May cause internal organ damage from repeated oral exposure at high doses.

PRECAUTIONS: Store in original container, tightly closed, away from foodstuffs in a cool, dry, secured area. Avoid contact with skin and eyes and inhalation of spray mist. Wash hands and exposed skin before meals and after work. Avoid contamination of any water supply with chemical or empty container. Apply this product carefully. Ensure compliance with relevant regional air management plans.

Avia shall not be used on structures where food for human consumption is being produced.

HARMFUL TO THE SOIL ENVIRONMENT. TOXIC TO TERRESTRIAL VERTEBRATES. VERY TOXIC TO TERRESTRIAL INVERTEBRATES.

TOXIC TO AQUATIC LIFE WITH LONG-LASTING EFFECTS. Avoid contamination of any water supply with chemical or empty container. A strategy to minimise spray drift should be employed at all times when applying spray near aquatic environments. Avia shall not be applied onto or into water.

DISPOSAL OF CONTAINER: Triple rinse container and add residue to spray tank. Return empty container to an AgRecovery collection point for disposal.

FIRST AID: If swallowed do NOT induce vomiting. For advice, contact the National Poisons Centre on 0800 POISON (0800 764766) or a doctor immediately. If spilt on the skin, remove contaminated clothing and wash affected areas of skin. DO NOT SCRUB THE SKIN. If concentrate is splashed in eyes flush with running water for at least 15 minutes. Take to hospital without delay.

SPILLS: Wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely (such as to a suitable landfill).

Batch number and manufacturing date: See on packaging
