**GENERAL INFORMATION**

Curator is a DMI fungicide which may be applied as a spray treatment to ornamentals and stonefruit, as a dip treatment to ornamentals, and a drench treatment in mushrooms.

**Resistance Management:** Curator is a **GROUP 3 FUNGICIDE** with the Demethylation Inhibitor (DMI) mode of action. Resistance to this and other DMI products could develop from repeated use. To minimise this risk use strictly in accordance with label instructions and alternate with fungicides from alternate chemical groups.

**IT IS AN OFFENCE TO USE THIS PRODUCT ON ANIMALS.**

**DIRECTIONS FOR USE:** The method of application shall be limited to ground based application only.

**Mixing:** Thoroughly pre-mix the required amount with a little water to form a slurry. Add water whilst agitating. For spray treatments maintain agitation while mixing and applying. Also agitate thoroughly after a stoppage, before recommencing spraying. Use immediately after mixing.

**COMPATIBILITY:** Curator is compatible with most commonly used insecticides and fungicides. DO NOT use with alkaline materials such as lime sulphur or Bordeaux mixture.
